

PRIMATECH HARDWOOD FLOORING CLEATS

Specifically designed for the application of hardwood flooring, Primatech steel cleats are ideal for fixing various types of wood strips or planks to bases such as plywood or joists. Each cleat features a sharp set of barbs on each side to provide just the right amount of holding power. This design allows floors to expand and contract with seasonal cycles, thereby preserving their integrity and providing a lifetime of performance.

Cleat nails minimize wood splitting and still allow for expansion and contraction of flooring material.

Features

- Sharp tip and edges to prevent tongue splitting
- Resin coated for additional sub-floor retention strength
- Collated tape to hold nails together and eliminate waste due to break-up
- Sturdy steel that won't bend, even after multiple hits

Carbon steel
